Board: CBSE — **Course Type: Full-time**

Experience

AI Engineer Trainee — **2026 – Present**
Calibo

- Working with Python, Generative AI, LLMs, prompt engineering, RAG, embeddings, and semantic search through practical AI and data engineering use cases.
- Developing data processing and analytics workflows using Python, Pandas, NumPy, SQL, and Power BI.

Projects

CatalogIQ AI – AI-Powered E-Commerce Product Discovery Engine
React.js, FastAPI, MongoDB, Sentence Transformers, FAISS, Gemini

- Developed an AI-powered product discovery and recommendation application using semantic search, embeddings, and vector similarity.

FreshBowl – Customer Vendor Ordering System
React.js, Node.js, Express.js, MongoDB, REST APIs, JWT

- Developed a Mer-stack food ordering platform connecting customers and vendors through a responsive React.js application and RESTful backend.

Achievements

- **Cloud Optimization & Certification:** Reduced deployment time by approximately 30% using Docker, Kubernetes, and CI/CD & AWS Certified Data Engineer – Associate and AWS Certified Developer – Associate.
- **Retail Analytics:** Built a retail sales data pipeline and analyzed store-level sales trends to generate business insights using Python, SQL, and Power BI.
